

PUBLIKATIONSLISTE - Dr. ANDREAS RANG

ORIGINALARBEITEN IN ZEITSCHRIFTEN MIT UNABHÄNGIGEM GUTACHTERSYSTEM

1. Weber M, Gawanbacht A, Habjan M, **Rang A**, Borner C, Schmidt AM, Veitinger S, Jacob R, Devignot S, Kochs G, García-Sastre A, Weber F. Incoming RNA virus nucleocapsids containing a 5'-triphosphorylated genome activate RIG-I and antiviral signaling. *Cell Host & Microbe*. 2013, 13:336.
2. Lalwani P, Raftery MJ, Kobak L, **Rang A**, Giese T, Matthaei M, van den Elsen PJ, Wolff T, Krüger DH, Schönrich G. Hantaviral mechanisms driving HLA class I antigen presentation require both RIG-I and TRIF. *European Journal of Immunology* 2013, DOI: 10.1002/eji.201243066.
3. Popugaeva E, Witkowski PT, Schlegel M, Ulrich RG, Auste B, **Rang A**, Krüger DH, Klempa B. Dobrava-Belgrade hantavirus from Germany shows receptor usage and innate immunity induction consistent with the pathogenicity of the virus in humans. *PLoS One*. 2012;7(4):e35587.
4. Mertens M., Essbauer S.S., **Rang A.**, Schröder J, Splettstoesser W.D., Kretzschmar C., Krüger D.H., Groschup M.H., Mätz-Rensing K., Ulrich R.G. Non-human primates in outdoor enclosures: Risk for infection with rodent-borne hantaviruses. *Veterinary Microbiology* 2011, 147:420.
5. Handke W., Oelschlegel R., Franke R., Krüger DH., **Rang A**. Generation and characterization of genetic reassortants between Puumala and Prospect Hill hantavirus in vitro. *Journal of General Virology* 2010; 91:2351.
6. Kirsanovs S., Klempa B., Franke R., Lee MH., Schönrich G., **Rang A.**, Krüger D.H. Genetic reassortment between high-virulent and low-virulent Dobrava-Belgrade virus strains. *Virus Genes* 2010, 41:319.
7. Guhl S., Franke R., Schielke A., Johne R., Krüger D.H., Babina M., **Rang A**. Infection of in vivo differentiated human mast cells with hantaviruses. *Journal of General Virology* 2010; 91:1256.
8. Adamaszek M., Heinrich A., **Rang A.**, Langner S., Khaw AV., Cerebral sinovenous thrombosis associated with Lyme neuroborreliosis. *Journal of Neurology* 2010; 257:481.
9. Handke W., Krüger DH., **Rang A**. Defective particles can lead to underestimated antibody titers in virus neutralization tests. *Intervirology* 2009; 52:335
10. Handke W., Oelschlegel R., Franke R., Krüger DH., **Rang A**. Hantaan virus triggers TLR3-dependent innate immune responses *Journal of Immunology* 2009; 182:2849.
11. Schmidt-Chanasit J., Meisel H., Hofmann J., **Rang A.**, Lamprecht E., Ulrich RG., Doerr HW. Clinical course and laboratory parameters of the first Dobrava-Belgrade hantavirus infection imported to Germany. *Journal of Clinical Virology* 2008; 42:91.
12. Oelschlegel R, Krüger DH, **Rang A**. Characterization of Type I and Type II Interferon-Induced Inhibition of Hantaan Virus Replication in vitro. *Virus Research* 2007; 127:100.
13. **Rang A**, Heider H, Ulrich R, Krüger DH. A novel method for cloning of non-cytolytic viruses. *Journal of Virological Methods* 2006; 135:26.
14. **Rang A**, Linke B, Jansen B. Detection of RNA variants transcribed from the transgene in Roundup Ready soybean. *European Food Research and Technology* 2005; 220:438.
15. Ehlers I, Horke S, Reumann K, **Rang A**, Grosse F, Will H, Heise T. Functional characterization of the interaction between human La and hepatitis B virus RNA. *Journal of Biological Chemistry* 2004; 279:43437.
16. **Rang A**, Linke B, Jansen B, Zagon J, Broll H, Schauzu M. Die Mikroarray-Technologie als Beitrag zur Prüfung der gesundheitlichen Unbedenklichkeit gentechnisch veränderter Pflanzen. *Lebensmittelchemie* 2003; 57:147.
17. **Rang A**, Bruns M, Heise T, Will H. Antiviral activity of interferon-alpha against hepatitis B virus can be studied in non-hepatic cells and is independent of MxA. *Journal of Biological Chemistry* 2002;

277:7645.

18. Horke S, Reumann K, **Rang A**, Heise T. Molecular characterization of the human La protein/hepatitis B virus RNA B interaction in vitro. *Journal of Biological Chemistry* 2002; 277:34949.
19. **Rang A**, Heise T, Will H. Lack of a role of the interferon-stimulated response element-like region in interferon alpha-induced suppression of hepatitis B virus in vitro. *Journal of Biological Chemistry* 2001; 276:3531.
20. Chang SF, Netter HJ, Hild E, Schuster R, Schäfer S, Hsu YC, **Rang A**, Will H. Duck hepatitis B virus expresses a regulatory HBx-like protein from a hidden open reading frame. *Journal of Virology* 2001; 75:161.
21. **Rang A** and Will H. The tetracycline-responsive promoter contains functional interferon-inducible response elements. *Nucleic Acids Research* 2000; 28:1120.
22. **Rang A**, Günther S, Will H. Effect of interferon alpha on hepatitis B virus replication and gene expression in transiently transfected human hepatoma cells. *Journal of Hepatology* 1999; 31:791.

ÜBERSICHTSARTIKEL

23. **Rang A**. Modulation of Innate Immune Responses by Hantaviruses. *Critical Reviews in Immunology*. 2010, 30:515 (Review).
24. Schönrich G., **Rang A**., Lütke N., Raftery M., Charbonnel N., Ulrich R.G. Hantavirus-induced immunity in rodent reservoirs and humans. *Immunological Reviews* 2008; 225:163 (Review).
25. Ulrich R and **Rang A**. Hantaviren. *Immunologie Aktuell* 2005; 16:2 (Review).
26. Pult I, Günther S, Burda M, Dandri M, Iwanska A, Kalinina T, Possehl C, **Rang A**, Sommer G, Wollersheim M, Will H. Hepatitis B virus variants and their role in hepatopathogenesis. *Hepatologia Polska* 1998; 5:57 (Review).

BUCHKAPITEL

27. Schlegel M, Jacob J., Krüger D.H., **Rang A**. and Ulrich R. Hantavirus Emergence in Rodents, Insectivores and Bats. In: *The Role of Animals in Emerging Viral Diseases*. Ed: Nicholas Johnson 2014.
28. Heise T, Dandri M, Petersen J, **Rang A**, Burda M, Will H. Modulation of HBV-infection by viral and cellular mechanisms. In: *Chronic Hepatitis: New Concepts of Pathogenesis, Diagnosis and Treatment*. Eds: H.P. Dienes, P. Schirmacher, C. Brechot, K. Okuda, 2000; 116a:23.
